

NEW!

Air pressure test manometer with testing needle

The reliable and handy air pressure test manometer from Leister is the perfect solution for testing the integrity of dual track seams with test channel. It is suitable on construction sites for civil engineering, tunneling and landfills. The revised model is now even more secure – in terms of the daily use and for the detection of leaks.

- Easy and precise seam testing
- High security due to hand and needle protection
- Practical storage case

Article no.:

142.475	Air pressure test manometer with testing needle
142.569	Spare needle

Included in delivery are storage case and o-rings

More security for user and device:
hand and needle protection

Easy and precise non-destructive seam testing on the construction site

Included in delivery: O-rings and Storage case

Spare needle (not included in delivery)
